PRICES in this catalog cancel all previous lists and quotations, and are subject to change without notice.

"3 TO 4 FEET" means that the tree or plant will be 3 feet or over, but under 4 feet; and throughout the list the same.

STOCK SPECIALLY SELECTED by customers at the Nurseries will be charged according to the value of the stock chosen, irrespective of catalog price.

VISITORS WELCOME. You are invited not only to visit the office, but to go over the extensive grounds as well. There are more than 500 acres in the farm.

OUR LOCATION. We are nine miles out on the Friendly Road Extension and Winston-Salem highway, U. S. 421 west, adjoining the Airport at Friendship. Our shipping point is Guilford College, N. C.

PRICES INCLUDE PACKING, EXCEPT ON SPECIAL BULKY PIECES, for which cost of packing will be extra, and f.o.b. our shipping station, or for local delivery on our regular routes.

TERMS, CASH WITH ORDER, except to persons who satisfy us as to their responsibility, when for their convenience accounts will be opened, due in 30 days from date of invoice.

AUTO-TRUCK DELIVERIES, based on actual cost, if no Government regulations to interfere, are made within a reasonable distance of our Nurseries. The advantages of truck delivery are many. Boxing is eliminated, stock arrives in much better condition, and the goods are landed on the ground within a short time after being dug.

GUARANTEE. Lindley Nurseries, Inc., exercise the greatest care possible to keep their varieties true, and hold themselves in readiness to reship any tree or plant that may prove otherwise, or refund the original sum of money paid therefor, if reported to them within five years from date of order. It is mutually agreed that they are not further responsible in any case.

REPLACEMENT POLICY. When planting is not done by us, our responsibility ceases upon delivery of the stock in good condition. However, if it has been properly cared for, and if the bill was paid as agreed, we will resupply at half list price.

Where we do the planting under a replacement guarantee, we will resupply any plants that die within the specified time **PROVIDED** the account is paid as agreed and reasonable care has been taken.

OFFICIAL INSPECTION. We furnish with each shipment a certificate that our Nurseries have been examined by the State Entomologist of North Carolina and found free from contagious diseases.

100 Years

That is a long time, but the Lindley nurseries have been in existence since 1842, and within a few miles of the original starting place.

It is now under the leadership of the FOURTH generation, and still going strong.

A concern has to live a clean, honorable life to stay in business that length of time!

Beginning in a small way in 1842, with a select list of various fruit trees, it has grown till today there are more than 500 acres in the nursery farm, and almost all types of trees and plants are produced, as well as doing extensive landscape work.

With our facilities and experience, we are in a position to handle your business along this line, and want to hear from you.

Write, telephone, call in person; we are here to serve you, and our representatives travel widely.

FLOWERING SHRUBS

There is a multitude of ways that flowering shrubs may be used to advantage, as individual specimens, group plantings, hedges, etc. Shrubbery borders are now much more in vogue than formal clipped hedges; they can be so arranged as to give almost continuous bloom or berry the year 'round, thus adding interest to your home grounds. The descriptions are as plain and accurate as we know how to make them, but if you need advice, write us and our Landscape Department will help you decide what best to use.

These plants are dug and handled without balling; if balling is desired, double the price.

LANDSCAPE DEPARTMENT: We are prepared to render you every help needed to make your place outstanding in appearance. Our landscape architects are men of training and experience, and know Southern plant material and what to do with it to get the best artistic results for you in improvement of your place. Not only do we offer plans and plants, but actually set the plants on your lawn within a reasonable distance. All at lowest cost possible for the class of work done.

BROAD-LEAF EVERGREENS

This class of plant material is suited to the Piedmont section better than almost anything else, as you can have plants that are evergreen, and many of them bloom and berry, while some lend themselves to formal trimming. Our good Yankee friends would like to have many of them, but their winters are too cold in most cases. We are most fortunate in being privileged to live with such plants around us. They almost all stand shearing well.

Dug with ball of earth unless otherwise specified.

N. R. means that it will be handled naked rooted.

CONIFEROUS EVERGREENS

Some locations around the home grounds just seem to call for this type of plant, in some of its forms, either upright, medium or spreading growth. The varieties offered here are tried and true and will give good results when planted in suitable locations. Most of the sorts require almost full sun, though a few will do very well in partial shade.

BIOTA is used here to designate the Chinese type of conifers, to clearly distinguish from the American Arborvitae family, listed under the name of *Thuja occidentalis* further on in this book.

Biota aurea conspicua (Goldspire Arborvitae). Bright golden foliage. A good grower and will make a large plant if unpruned.

18 to 24 ins.	2.00

Caco. Large red, vigorous; juicy, sweet.

Concord. Large bunches and berries; black. Very fine.

Niagara. Bunches medium, berries large; white. Mid-season.

Catawba. Coppery red. Large bunches. Late.

Scuppernong Family, 2-year	\$1.00
---	--------

James. Largest; black; juicy. Prolific. Latest.

Scuppernong. Large, bronze-colored; flesh juicy, excellent.

Thomas. Large; reddish purple; tender, sweet, highest quality. Earliest of the family.

Male. Old wild muscadine to pollinate other sorts.

THE BRAMBLES

After the plant has fruited in the spring, the old canes should be removed, cutting off at the ground, and burning. The canes that fruit another season will then come up and be ready to bear the following spring.

BLACKBERRY PLANTS

These require but little attention, producing good crops of fine berries. They are native to the Piedmont section, and will give excellent results with but little care except keeping the weeds and grass out, in addition to removing the old canes. No staking required.

Alfred. One of the best sorts; the berries are large and nearly coreless. Productive.

Eldorado. A strong, upright grower; large juicy berries.

Prices: Per 10, \$1.50; per 100, \$10.00

BOYSENBERRY PLANTS

The berries are very large, delicious flavor. The plant is a very vigorous grower, and for this reason should be planted on medium to rather poor soil, well drained; tie up to a wire fence of about three strands, handling carefully.

Prices: Per 10, \$2.50; per 100, \$20.00

DEWBERRY VINES

Not suited to mountain country, but do well in eastern and Piedmont sections. Advisable to tie the vines to a stake.

Lucretia. The old stand-by. Early bearing, large, delicious.

Young. A newer sort, considered better than Lucretia by some people.

Prices: Per 10, \$1.50; per 100, \$10.00

RASPBERRY PLANTS

More difficult to grow in Piedmont section, and of but little value in eastern section unless given special attention. The plants do much better if kept mulched. The soil must be good, and the deeper the better.

Black: Cumberland is the standard black sort, and is a favorite where black raspberries are desired.

Red: Flaming Giant does well in this section, we think perhaps the best, though not well known.

Latham is recommended as being one of the good ones; a thrifty grower, bright red berries.

Newburgh has proven to us to be one of the best. Large bright red berries of good quality.

Prices: Per 10, \$1.50; per 100, \$10.00

Note. No less than 10 sold in any one order.

STRAWBERRIES

The following varieties have been selected and are offered after considerable thought, believing they are the best for general home use in this section.

Blakemore. A rank, vigorous grower. Very productive. Early ripening. Rather tart. Very popular.

Fairmore. A cross between Fairfax and Blakemore, and combines the good qualities of both. If only one sort is desired, we think this should be it.

Fairfax. Very fine quality; berries large, firm, good keeper. Good grower, and moderately productive. Mid-season.

Spring fruiting sorts:

50 for \$1.50

100 for \$2.50

300 for 6.00

1000 for 15.00

Gem Everbearing. A consistent producer of good berries, particularly if given extra care, fertilization and cultivation.

50 for \$2.50

100 for \$4.00
